- Worldwide Voltage Compatibility (90–260V)
- Individually Quality Inspected
- Premium Architectural-Grade Materials

Product Features

- Monumental crown-inspired architectural design
- Sculptural vertical composition for double-height interiors
- Architectural-grade stainless steel construction
- Polished chrome structural framework
- A+ grade lead-free precision-cut crystals
- Exceptional light clarity and controlled brilliance

Materials & Construction

The Plaza Crown Crystal Chandelier is engineered from architectural-grade stainless steel and finished in polished chrome to achieve exceptional structural rigidity while maintaining an elegant visual lightness. Hundreds of A+ grade lead-free precision-cut crystals are individually aligned to maximise clarity, controlled refraction, and balanced illumination throughout the entire composition. Its distinctive crown silhouette is formed through a carefully engineered arrangement of structural crystal elements that expand outward before narrowing into a dramatic vertical cascade. Designed specifically for double-height architectural spaces, the Plaza Crown functions as both an illuminating centrepiece and a permanent sculptural installation, combining contemporary engineering with timeless luxury. Every chandelier is individually assembled, inspected, and finished to ensure outstanding precision, durability, and long-term performance.

ARCHITECTURAL PRODUCT SPECIFICATION

The Plaza Crown Crystal Chandelier transforms lighting into architecture through its commanding scale, sculptural elegance, and precision-crafted crystal composition. Created for landmark residences and prestigious hospitality environments, it delivers enduring visual impact while defining space with sophistication, permanence, and contemporary metropolitan luxury.
