Product Features

- Flagship linear chandelier of the Plaza Crystal Collection
- Contemporary architectural design with sculptural geometry
- Architectural-grade stainless steel construction
- Polished chrome structural framework
- A+ grade lead-free precision-cut crystals
- Exceptional clarity, brilliance, and controlled light refraction

Materials & Construction

The Plaza Crystal Linear Grande Chandelier is engineered from architectural-grade stainless steel and finished in polished chrome to achieve exceptional structural strength, dimensional stability, and refined visual clarity. Each A+ grade lead-free crystal is precision cut and meticulously aligned to maximise brilliance while maintaining the disciplined geometry that defines the Plaza Crystal Collection.

Its elongated linear profile establishes a strong architectural axis, allowing the chandelier to illuminate expansive dining tables, boardrooms, kitchen islands, and contemporary reception spaces with balanced, uninterrupted light. The gently flared crystal ends soften the composition while reinforcing its sculptural identity, creating a harmonious blend of precision engineering, modern elegance, and enduring craftsmanship. Every fixture is individually assembled and rigorously inspected to ensure flawless alignment, structural integrity, and exceptional long-term performance.
